## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/12/2011 has been entered.

### ***Allowable Subject Matter***

2. Claims 1 and 3-10 are allowed.
3. The following is an examiner's statement of reasons for allowance: none of the prior art of record teaches or suggests the features as recited in the claims.

The following features are exemplary with respect to independent claim 1: ii) persistent storage memory operatively connectable to said one or more data processors, said persistent storage memory storing a plurality of media file metadata items, one or more of said media file metadata items containing reference(s) to one or more other media file metadata items, where the one or more of said media file metadata items containing the reference(s) is about a media file which encodes content that has been judged by an editor to be semantically-related to the content encoded by the media file(s) associated with the media file metadata item(s) to which the reference(s) refer; iii) volatile memory, operatively connectable to said one or more data

Art Unit: 2169

processors, for storing one or more of said media file metadata items; iv) database management system software executable by said one or more data processors to respond to a query by passing media file metadata items meeting one or more criteria specified in said query from said persistent storage memory to said volatile memory; v) querying code executable by said one or more data processors to pass a query to said database management system software.

The following features are exemplary with respect to independent claim 8: storing a plurality of media file metadata items in said second data store, together with relationship data comprising reference(s) to one or more related media file metadata items where one or more of the plurality of media file metadata items stored together with relationship data comprising the reference(s) is about a media file which encodes content that has been judged by an editor to be semantically-related to the content encoded by the media file(s) associated with the media file metadata item(s) to which the reference(s) refer; and executing a process on said processor to: i) fetch one or more media file metadata items from said second store together with said relationship data including said reference(s) to one or more related media file metadata items; ii) responsive to receipt of said relationship data, use said reference(s) to fetch one or more of said related media file metadata items from said second memory to said first memory; and iii) check, on subsequent requests for a media file metadata item, whether said requested media file metadata item is present in said first store and read said media file metadata item from said first store if found.

Art Unit: 2169

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
